ABOUT ME

Unity Developer and Computer Science graduate with hands-on experience developing 3D games using Unity and C#. Built immersive horror-game environments with gameplay mechanics, lighting systems, sound integration, and performance optimization. Strong foundation in C, C++, OpenGL, DirectX11, and graphics programming. Seeking entry-level Game Developer or Software Developer opportunities.

SKILLS

- **Languages:** C, C++, C#, Java, Python, JavaScript
- **Game Development:** Unity, OpenGL, OpenGL ES, DirectX11, GLSL, Assimp
- **Tools:** Git, Visual Studio, VS Code, Win32 SDK
- **Concepts:** OOP, Data Structures, Algorithms, Graphics Programming, Linear Algebra

PROJECTS

- **Custom Game Engine | C++, OpenGL, GLSL, Dear ImGui**
 - Developed a custom game engine featuring shader management, scene management, texture loading, camera systems, model rendering, and real-time graphics rendering using OpenGL and GLSL.
 - Built editor and debugging tools using Dear ImGui.
 - Implemented real-time rendering systems using modern OpenGL and GLSL shaders.
- **3D Model Loading and Rendering System | C++, OpenGL, Assimp**
 - Developed a 3D model loading system using Assimp to import and render external model formats.
 - Implemented mesh processing, texture loading, material handling, and real-time rendering with OpenGL.
 - Supported efficient rendering of complex 3D assets using custom shader programs.
- **Sanity's Echo Prison | Unity, C#**
 - Developed a 3D horror game featuring AI enemies, inventory systems, and immersive environments.
 - Implemented gameplay mechanics, interaction systems, atmospheric lighting, and audio effects.
 - Optimized rendering performance and debugged gameplay features.
- **OpenGL Graphics Application | C++, OpenGL, Win32 SDK**
 - Developed a graphics application implementing 2D and 3D geometric shapes with texture mapping and lighting effects.
 - Built custom UI and menu handling using the Win32 API.
- **Rocket Booster Game | Unity, C#**
 - Developed a physics-based rocket navigation game featuring thrust controls, collision detection, and level progression.
- **Personal Portfolio Website | HTML, CSS, JavaScript**
 - Designed and developed a responsive personal portfolio website showcasing projects, technical skills, and professional experience.
 - Implemented modern UI design principles and cross-device compatibility.

EXPERIENCE

Unity Developer Intern - Akiyam Solutions

- Developed a 3D horror game using Unity and C#.
- Designed gameplay mechanics, interactive systems and level designing.
- Implemented lighting, audio, and visual effects for immersive gameplay.
- Debugged and tested gameplay features.
- Collaborated with team members using Git-based version control workflows.

EDUCATION

M.Sc. Information Technology	9 CGPA
Dr. DY Patil ACS College	2024–2026
B.Sc. Computer Science	9 CGPA
SRTM University	2021–2024

CERTIFICATIONS & SEMINARS

- Real Time Rendering in OpenGL and DirectX. At AstromediComp.
- Masterclass in C. At CoreCode Programming Academy.
- Heterogenous Parallel Programming.(CUDA & OpenCL)
- Multi OS Installation Seminar.
