

# SANDIP GUDLE

## GRAPHICS PROGRAMMER

Pune, 411018 | 9637659641 | [sandipgudle121@gmail.com](mailto:sandipgudle121@gmail.com) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

### SUMMARY

---

Graphics Programmer with 2+ years of hands-on experience building real-time rendering systems in C++ and OpenGL/GLSL, including a custom game engine (shader pipeline, scene graph, renderer) and an Assimp-based 3D asset-import pipeline. Comfortable working close to the GPU shader authoring, texture/material handling, and rendering performance optimization across Windows, Linux, macOS, Android, iOS, and WebGL. Seeking an entry-level Graphics Programmer or Rendering Engineer role.

### TECHNICAL SKILLS

---

**Graphics APIs:** OpenGL, OpenGL ES, DirectX 11, GLSL, WebGL

**Languages:** C++, C, C#, Python, JavaScript

**Engine & Rendering Systems:** Shader Pipelines, Scene/Model Rendering, Texture & Material Handling, Asset Import (Assimp), Dear ImGui Tooling

**Core CS:** Data Structures, Algorithms, Linear Algebra, OOP

**Tools & Platforms:** Git, Visual Studio, VS Code, Win32 SDK

### EXPERIENCE

---

#### Graphics Programming Trainee - AstroMediComp

2023 – 2025

- Engineered real-time rendering features - shader programming, model rendering, texture mapping, and lighting in modern OpenGL, GLSL, and C++.
- Built and tested graphics applications across six platforms (Windows, Linux, macOS, Android, iOS, WebGL), gaining hands-on cross-platform rendering experience.
- Collaborated within a team on graphics programming projects, using Git for version control, feature branching, and code integration.
- Took part in code reviews, debugging, and testing to keep rendering pipelines stable and regression-free.

### PROJECTS

---

#### Custom Game Engine

C++, OpenGL, GLSL, Dear ImGui

- Built a custom rendering engine from scratch, shader management, texture handling, camera system, and model rendering.
- Authored real-time rendering systems using modern OpenGL and hand-written GLSL shaders.
- Built in-engine editor and debugging tools with Dear ImGui to speed up iteration on rendering features.

#### 3D Model Loading and Rendering System

C++, OpenGL, Assimp

- Built a 3D model import pipeline using Assimp to load and render external model formats into the custom renderer.
- Implemented mesh processing, texture loading, and material handling for real-time rendering in OpenGL.

#### OpenGL Graphics Application

C++, OpenGL, Win32 SDK

- Developed a graphics application rendering 2D and 3D geometric primitives with texture mapping and lighting effects.
- Built a custom UI and menu system directly on the Win32 API, without a game engine or framework.

### EDUCATION

---

#### M.Sc. Information Technology - Dr. DY Patil ACS College

2024 – 2026

- CGPA: 9.0

#### B.Sc. Computer Science - SRTM University

2021 – 2024

- CGPA: 9.0

### CERTIFICATIONS & SEMINARS

---

- Real-Time Rendering in OpenGL and DirectX - AstroMediComp
- Heterogeneous Parallel Programming (CUDA & OpenCL) - AstroMediComp
- Multi-OS Installation Seminar - AstroMediComp
